Abstract

OneWorld, from the same minds behind the fiat-to-crypto gateway platform CryptoFlow, is a revolutionary cryptocurrency platform that will allow users to bring their cryptocurrency with them via an application on their mobile phone. This application will give investors the unique opportunity to bring their cryptocurrency assets anywhere they go. This includes their favorite masternode coins.

Up until now, cryptocurrency investors (especially masternode investors) have been restricted to desktop computers, laptop computers, and virtual private servers (VPS). Mass adoption is not possible when your digital assets are hamstrung by the limitations of your technology.

The application currently being developed by the OneWorld team will be capable of all the normal functions of your desktop (QT) wallet. This includes sending and receiving transactions, viewing your transaction history, staking your coins for rewards, and setting up masternodes directly from the phone application.

Project Details

The OneWorld application, a product of OWO Software LTD, is designed to be a full service platform for cryptocurrency investors on the move. Every one of us now carries a powerful computer in our pockets; 32,000 times more powerful than the computers that put humans on the moon. The next evolution of cryptocurrency will be the increase in convenience of bringing digital assets with to the grocery store, to a local restaurant, or on the next international trip.

Everything that is capable within a QT Desktop Wallet will be possible with the OneWorld mobile phone application. For the first time, you will be able to earn Staking Rewards on your coins and set up masternodes directly from your phone. The application will first be available on Android followed shortly by iOS.

A dedicated team of developers are hard at work on the OneWorld application. Fees for using the application will be payable in OWO and CFL coins. Then Fiat via CryptoFlow platform will be an option as the project grows. Additional features are being explored by the team that will increase the user experience, overall convenience, and may be able to save users money.

Coin Details

The OWO coin was carefully designed to not flood the market with coins. A slower emission rate of coins will allow the market to stabilise and find a price equilibrium for investors.

The reward structure has a direct relationship with the projected amount of masternodes on the network. The Premine coins will be used for project funding initially and also for different referral reward programs the OneWorld team will be running.

- Name — OneWorld
- Ticker — OWO
- Algorithm — Quark
- Max Supply — 500,000,000
- Reward Rate — MN 80% / POS 20%
- Masternode collateral — 100,000 OWO
- Premine 5% — 25,000,000
- Block Time — 60 seconds
- MinStakeAge — 1 Hour
- Block Explorer — <https://owo.exp.monitorit4.me/>

Reward Structure

Blocks	Time - Weeks	Time - Years	Rewards	Total Rewards	Ratio
1			25905339	25905339	Premine 5%
2 - 6002	0,60	0,011	2	12000	POS Only
6003 - 10000	0,40	0,008	100	399700	Early Bird Block
10001 - 30001	1,98	0,038	75	1500000	80% MN / 20% POS
30002 - 50002	1,98	0,038	140	2800000	
50003 - 80003	2,98	0,057	210	6300000	
80004 - 110004	2,98	0,057	280	8400000	
110005 - 150005	3,97	0,076	350	14000000	
150006 - 200006	4,96	0,095	410	20500000
